Preschool Wooden Furniture

NATURAL, HEALTY AND ARTISTIC CHOICE iN EDUCATIONAL EQUIPMENTS: WOOD!

Our company, Ens Ahsap established since 1958 as a smal lumber factory in the centre of Bolu province with its attractive forested mountain countryside and has been operating in the wood sector for three generations.

As its well known, in the most important characteristics of wood as a natural material are its durability, healthiness and endurance in the aspect of usage.

Ens Ahsap has adopted the most important characteristics of wood as a principle for itself and has neve comprimised these principles in any kind of product that it produces.

While deciding on how we as Ens Ahsap could play our role in the importance of natural furnitures for a healty life, we decided that it would be more useful to begin withe pre-school children as it is the primary age to arouse consciousness. therefore, while producing our tables and chairs, we paid great attention to their design and ergonomics as well as the use of high-quality, lasting and natural materials. As a result, we made the tables and chairs avaible safely and comfortably to our children where it plays a major role during the pre-school education.

Besides these features, we are able to offer custom made products for each school with our “private collection” series. We have been assisting them in making a difference in their quality and service by ornamenting their own logos and emblems.

It should be remembered that quality is hidden behind details.

Eren SARINALBANT

made of REAL WOOD

From the heart of nature

For the best product quality, we carefully select the best quality of veneers. Veneer is the one of the best raw material to produce environmental products. It is a real wood and also totally ecological.

Veneer

- is part of real wood
- is a natural product
- is durable and long-lasting
- is biodegradable

Respect to nature

Wood sourced from well-managed wood protectant oils and oil-based painting.

Veneer is obtained by slicing or peeling wood logs with different methods. According to the structure of the sliced tree is produced in various thickness and length. It is the most economical use of wood as a valuable raw material.

“Veneers which we used in our products are obtained from beech trees, so we provide more durable and long-lasting products. All our products are guaranteed for 5 years against production defects.”

HPL COLOURS

Durable laminate plates (HPL) prepared according to demanded colours are covered on the surface of the product.

NATURAL OIL BASED PAINT LAYER

- ✓ Oil based natural color overlay
- ✓ Texture of wood
- ✓ Customizable color options

We apply oil based wood paint on the sanded surface and feed the pigments inside the veneer. Thus, we give the product a permanent color without spoiling the characteristic structure of the veneer.

Certificates of Oil Based Paints

STORING

The chairs and stools are stackable, so they take up very little space when not in use.

USER FRIENDLY

We use bolting systems to produce all our products in simple disassembled form and to provide long-lasting durability. We also use felt to protect hardwood, laminated floors, tile, linoleum etc.

Highchair & Learning Tower

Designed in Germany

Little Duck®

A CHAIR FOR LIFE:

Our high chair converts into a learning tower with a simple flip.

PERFECT FOR ALL TABLES:

The children's chair has its own shelf and is also the perfect height. So your little angel is always there and enjoys being there with the big ones.

TESTED & SUSTAINABLE:

The step stool is non-tilting and is made from sustainably managed European beech wood in accordance with safety standard DIN EN 14988.

ROBUST & DURABLE:

The learning tower and the highchair are designed for a load of 90 kilos. Safety that is important to us.

EASY CLEANING:

The wood has been sealed so that not only the table top, but also all other parts can be easily cleaned with a damp cloth.

Balance Board

The balance board, also known as the “rocker board”, is popular by children aged 3 and over. With the board, the children not only learn to control their balance, they also use their coordination skills. Furthermore, the children train their leg, pelvis and back muscles in a playful way. Due to its shape and size, the balance board is a great experience not only for children, it is also for adults. Try it out with your little ones.
