NATURAL, HEALTY AND ARTISTIC CHOICE IN EDUCATIONAL EQUIPMENTS: WOOD!

Our company, Ens Ahsap established since 1958 as a smal lumber factory in the centre of Bolu province with its attractive forested mountain countryside and has been operating in the wood sector for three generations.

As its well known, in the most important characteristics of wood as a natural material are its durability, healthiness and endurance in the aspect of usage.

Ens Ahsap has adopted the most important characteristics of wood as a principle for itself and has neve comprimised these principles in any kind of product that it produces.

While deciding on how we as Ens Ahsap could play our role in the importance of natural furnitures for a healty life, we decided that it would be more useful to begin withe pre-school children as it is the primary age to arouse consciousness. therefore, while producing our tables and chairs, we paid great attention to their design and ergonomics as well as the use of high-quality, lasting and natural materials.

As a result, we made the tables and chairs avaible safely and comfortably to our children where it plays a major role during the pre-school education. Besides these features, we are able to offer custom made products for each school with our "private collection" series. We have been assisting them in making a difference in their quality and service by ornamenting their own logos and emblems.

It should be remembered that quality is hidden behind details.

Production Inspired by Nature

As Ens Kids, we carefully produce our wooden products, keeping the safety and health of children at the forefront. We offer quality, durable and aesthetic designs with an environmentally friendly approach using natural wooden materials. Combining modern production techniques with handcrafting, we meticulously process every detail, adding value to both the education and the play world of children.

Natural wood and environmentally friendly production methods are preferred.

HPL COLOURS

Durable laminate plates (HPL) prepared according to demanded colours are covered on the surface of the product.

Wooden Kindergarten CHAIRS

Ergonomic and Safe Kindergarten Chairs: Kindergarten and nursery chairs are specially designed furniture that supports the physical and cognitive development of children.

STORING

The chairs and stools are stackable, so they take up very little space when not in use.

USER FRIENDLY

We use bolting systems to produce all our products in simple disassembled form and to provide long-lasting durability. We also use felt to protect hardwood, laminated floors, tile, linoleum etc.

Balance Board

The balance board, also known as the “rocker board”, is popular by children aged 3 and over. With the board, the children not only learn to control their balance, they also use their coordination skills. Furthermore, the children train their leg, pelvis and back muscles in a playful way. Due to its shape and size, the balance board is a great experience not only for children, it is also for adults. Try it out with your little ones.
